

Meet Gracie: AI Chatbot

Your Onsite Policy Guide

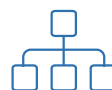

Gracie is available 24/7 to provide quick, clear responses to any policy-related question! Now available in PerformanceHQ, Gracie delivers precise and consistent answers based on your company's policy content, helping employees save time and avoid mistakes.

**Conversational AI
Technology**

**Draws From
Multiple Policies**

**Role-Specific
Responses**

**Instant Policy
Translations**

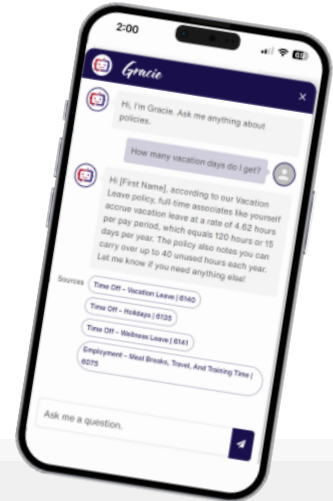

Just Ask Gracie!

Your team has to be prepared for anything, and the risks are high if they don't follow the proper procedures. Gracie ensures you always have the right answer by analyzing multiple policies and delivering a single, unified response.

Role-Specific Responses

Gracie greets everyone with a smile; however, her answers may differ based on your role and position with your company.

For example, if you are a leader, she will access management-specific policies, enhancing both the security and accuracy of the response.

Instant Policy Translations

Don't have all your policies translated? No problem! Using conversational AI, Gracie instantly translates and delivers answers for your multilingual employees.

Support a diverse team with AI tools that make it easy to engage employees whose first language is not English.

“The addition of Gracie has been a game changer in allowing our teams to provide self-help by quickly finding policies and procedures!”

Bryan Kulbacki CAM, CAPS

Training Director, Berger Communities
