

Research Finds That Tenant Satisfaction Increases Renewals, Decreases Vacancy Rate

Improving CRE tenant satisfaction scores can have remarkable results.

A recent MIT and Maastricht University study*, led by GRESB co-founder Professor Nils Kok, found direct effects of tenant satisfaction and renewal rates. We all know that tenant satisfaction matters, but this study quantified the connection between satisfaction and higher gross and effective rents.

RESEARCH RESULTS

MIT and Maastricht University researchers found that tenants who rate overall satisfaction **1 point higher** show:

INCREASE 

in renewal rate by as much as

8.5%

An increase in effective rent by

2.3%/YEAR

Future overall vacancy rate decreased by

 **6.7%**

Plus, the study found that overall tenant satisfaction is higher when properties are:

NEWER

HIGHER QUALITY

GREEN BUILDINGS

LARGER

HIGHER FLOORS

WHAT TENANTS WANT

There has never been a better time to understand what your tenants really want.

Don't make key business decisions based solely on gut instinct. Even when occupancies are low, surveys offer essential insight into tenant sentiment, so you can make property investments that best increase tenant satisfaction and renewals.

KingsleySurveys helps you understand:

- Satisfaction with property management
- Desired leasing and tenant improvements
- Tenant viewpoint of amenities
- Perception of janitorial, maintenance & engineering
- Service assessment areas for improvement
- Net Promoter Score™ metrics
- Satisfaction with property features
- Desired sustainability initiatives
- Insight into space needs
